All CDs are in "like new" condition. OS: Windows XP, Vista, 7,8,10. What will you do when you notice that your system is having problems? You will probably disable unnecessary programs, try to clean something up, install the necessary security updates. Or maybe try installing the drivers from one of the sites. Or you will look at the amount of free RAM and look for ways to increase it. Or maybe you just turn on the computer to the network and try to load the operating system. And you'll see that it's all useless.
