topcalina/winrar-serial-key-http-alturl-com-ax7ix ... This repository contains no tags. It contains keys to Asterisk (and other tools) for over 20 Linux distributions. These keys were taken from one of the repositories that includes Asterisk. Each distribution has its own keys, but depending on the distribution and version of Asterisk, they will be different. If you're using Asterisk on a distribution that already has the keys, then you don't need to look for this repository. If there are no keys in the distribution, then you need to run the command: `topcalina -p xxx.xxx.xxx.xxx -d nginx -h nginx -p xxx`.
