Q: Why multiple keys with the same value in a hashmap in JavaScript? I'm learning JavaScript and I have a problem with a hashmap in it. When I insert multiple keys with the same value, why are they all added? Does a hashmap work like a list or like a dictionary (with only 1 key with the same value)?

```
function createHashMap() { var hashMap = { }; var keys = ["key1", "key2", "key3
