As a two-player series of tightly-balanced games, Ironguard is hard to get into. That's because every stage you play is completely unique. In the language of roguelikes, this is called procedural generation. When you die, you have no opportunity to prepare yourself for future runs by collecting items, equipping weapons and learning the layout of the map. Fortunately, all of this information is carried over from run to run. This is due to the game's longevity and the fact that you can rapidly play through the experience one to three times. There's no single right way to play. Ironguard encourages experimentation and meta-gaming through a large arsenal of weapons and unique items. A single run in the game is completely different from the next one, which means that no playthrough feels the same. Tired of fighting giants and defending from colossal waves of enemies? Try out a new type of weapon or item that gives you an advantage over the deadly force of conventional firearms! No two runs are the same, and the end result is completely random!

Ironguard: Reboot is a port of the game. The game is playable on the Steam version of Ironguard, as well as on the Ironguard Rebirth Launcher. A bit of compatibility testing will occur, but we expect no major issues. :) Furthermore, as with any other Ironguard game, there are no additional terms of service, no plugins, and no DRM. The game is completely DRM-free, and the files are available to run on Windows, Mac OS X and Linux.

What's new:

Bucket Knight is a fictional supervillain appearing in American comic books published by Marvel Comics. The character was created by Chuck Austen and Wayne Engelhart and first appeared in Cloak and Dagger #1 (April 1974), with the name Namoripan (a play on words for the term "Nameri Pan"). As one of Marvel Comics' first costumed crimefighters, Bucket was employed by Arcade and the Nazis to overthrow the United States government. Publication history Bucket Knight first appeared in Cloak and Dagger #1 (April 1974), based on a character named Namoripan created by Chuck Austen and Wayne Engelhart. The character was used briefly in a 1974 one-shot comic, also titled Cloak and Dagger. In 1979, Namoripan appeared in the Marvel Graphic Novel Ghost Rider: The Iron Knight (1979) starring Ghost Rider. The character was also used in The Toy Masters #2 (Oct. 1989), inspired by the Black Scorpions from the X-Men comics, and the 1994 miniseries Marvel Knights: X-Men Nightcrawler (featuring the character created from a young Jean Grey's DNA by artist Neal Adams). Bucket was created by Chuck Austen and Wayne Engelhart, with a backup story created by Wayne Boring. Fictional character biography Bucket Knight, a Texan named Cecil Royce Buckner, was born the son of firearms manufacturers who sold many of the firearms used in the United States Civil War in the 1860s. He learned the family business but drifted from it. Cecil visited his wealthy brother Alfred, who described his "learning difficulties" to the public as mental illness. Alfred encouraged Cecil to become a sideshow performer, although Cecil always

resented his brother for this exploitation. As a child, Cecil attempted to use his great strength to beat up Alfred, but was stopped by a policeman. Royce Buckner became involved with the Ku Klux Klan during the American Civil War. In the late 1860s Buckner tried to create an armored suit that would enable him to take on artillery. The suit became an immediate success in Europe, where he renounced the United States. He then formed the United States Patriot Army which remained very active over the next few years. Ridiculing the United States government's attempt to stop his activities, Buckner ran for Governor of Texas, although he didn't actually win. Buckner continued to accumulate arms, and he secretly helped finance the Nazi Party in
