“On a high level, the principles are the same as those behind NBA 2K’s My Player mode; I’m a huge basketball fan so I’m very aware of the important mechanics that define NBA 2K’s version of this,” says Nick Channon, Senior Visual Designer at EA. “However, with FIFA, we have the luxury of being able to combine technology with completely new and never-before-seen gameplay elements.

“Technology like this cannot currently be seen on the PS4, so I think the next generation of sports games will look very different from what we have today,” he continues. “I’m all in favour of technology removing repetitive elements, and for this reason, as well as the obvious benefits of the new gameplay, we chose to bring it in. “We’re taking the best of what we have and looking ahead,” continues Channon. “We’re not trying to replicate real football; we’re not trying to reproduce the feel of the game. What we’re trying to do is move the game forward. “We’ve found that allowing the graphics engine to be able to run on the PS4 Pro brings visual improvements, particularly in on-pitch action, where FIFA never was able to run at a decent frame rate. We just simply cannot do what we want with the tools that we have today. “The physics engine really was not able to do what we wanted to do,” he adds. “The technical developer here at FIFA, Felix Krieger and his team, completely changed the engine, and it opened up so many new possibilities.” The team had to start from scratch to make a new physics engine, and while they brought in a new set of physical models, they found that the standard simulation of players wasn’t quite right. “We tried to change it but we couldn’t,” says Channon. “The engine we had for FIFA was based around run time physics. We had more models to go round but it wasn’t built the way we wanted it. “We were using a modeller as an animation

tool and just recreating the player models manually,” he continues. “We found that was simply not the way to do it and we ended up with something where

FIFA is the game that started it all. For more than 35 years FIFA has set the benchmark for sports gaming. EA SPORTS FIFA 19 gives you the opportunity to play, live and compete against your friends in iconic locations all around the world. FIFA Ultimate Team brings to life the most authentic collection of players and real-world teams through gameplay that is never the same. What has changed for the New FIFA? New Focus Soccer is always evolving and we feel it is important to evolve with it. We know that clubs are evolving with the sport, with sponsors and with the landscape of our game. Our goal is to make sure that FIFA continues to evolve in a way that reflects the game as it is in the real world. New Skill Tricks We're adding more ways to approach and play FIFA. We've taken a look at what the community is doing and reworked a number of key fundamental skills in order to make them even more fun to use. We've added the ability to shoot with the "cut shot" and tried to make the difference between "free" and "powered" shots as small as possible. Players can try the new "cross" and "long shot" to see if it suits their game more than the "free" shot. New Training You'll notice more focus on improving

your running and passing ability over time as your game moves from beginner to advanced. New Career Mode Build Your Own Legend In career mode you have a new blank slate to start from. Use your own players and create your own team and story in this mode. With this feature, it's like you're starting at square one and can make your own path to greatness. Create a league, create your own starting XI and get your team going. This mode is coming to FIFA 19. Improved AI With this build we've re-balanced the AI to focus on creating more diverse teams and to make the game play more authentic. We've also added improvements to AI tactics. They now adopt new moves when the opposition is weakened or is playing in a new position, like when the goalkeeper has a bad luck and needs to come off his line, or if a defender is injured. They also have a more defined sense of positioning. New Commentary and Spoken Word Commentary In FIFA 19, commentary has been re-mastered by the UK

**FIFA is a videogame franchise developed and published by Electronic Arts. It was first released in September 1993 for DOS. For over twenty years FIFA has been the king of all football games, turning out some of the industry's most realistic and authentic sports video games and sports titles. The latest release of the series, FIFA 16, has made the biggest impact since its initial release, making the game and its gameplay data the most visible brand and asset for fans and players alike. FIFA is the most comprehensive and credible sports gaming franchise in the world, defining the standard for sports games by the global sports gaming community. FIFA's innovative core gameplay, integrated media, groundbreaking third-party licensing programs, and ever-evolving development studios and gameplay technologies have shaped the sports game genre. Players have been given the tools to play the game how they want. High-def, fantasy-friendly soccer games have taken off, and the game is fan-controlled, with players controlling the games they love. With FIFA 16 and the new FIFA mobile application, real-world player personalities are back. New coach control options, banter with your favorite players and real-world commentary from the best voices in the business all make FIFA an authentic experience for all. FIFA is now a global brand with communities in more than 100 countries spanning North America, Europe, Africa, and across the rest of the world. With diverse audience reach and partnerships with major world football events, it is the ultimate sports franchise. Why is FIFA? FIFA is loved by millions of fans for more than two decades, due to its easy-to-pick-up style of gameplay and a much-loved sports theme.
