Yes, you read that right, sports buffs, that first-time-ever conference realignment. Two teams are moving west, two to the same city, and one of them is probably already regretting this move. It's a novel tactic, but one that worked wonders for the Portland Trail Blazers. Then again, Portland started with everything there was to have going for them, a trophy named after a guy who just so happened to be the most popular surfer, a franchise that got its name from the natives of a Pacific island that also happened to be the only place in the world that actually has no mountains, and a date with destiny that fell on a perfect october afternoon. The path to the NBA Finals wasn't always paved with sweet-smelling leaves and dew-dripping grass. First off, it's worth noting that the BN has gotten a much better bargain from the ACC than the Big 12 got from the PAC-12, so there's that. Second off, it still costs a lot of money to get into football. A lot. When the academics stop being a concern for the players and coaches, then maybe we can talk about money being an object. Sticking with the boondoggle theme, these things will cost you in the tens of millions of dollars. Headline-friendly names like Colorado,

Missouri, West Virginia, Texas A&M and Virginia Tech will reportedly cost around \$50 million apiece. To make it more palatable, the conference TV deals are lucrative. The contracts reportedly call for 5-years of \$5.3 billion, which is more than the current Big 10 deal. That will be why Nebraska is staying in the Big 10, and the new deal won't be signed until after the '11-'12 season. But there is certainly going to be a backlash to the new Big 12

objectivephysicsbydcpandeypdfdownload.Q: Need to purge unused javascript libraries in my website Hi all I have some unused javascript libraries in my web site. I want to empty them out. I am using ASP.Net 4.0 web forms. Thanks A: To delete files in an ASP.Net Project you can use the following:

```
public static void PurgeFiles(string target) { string dirPath =  
    Path.Combine(AppDomain.CurrentDomain.BaseDirectory,  
    target); if (!Directory.Exists(dirPath)) throw new  
    FileNotFoundException(target, Resources.FileNotFound);
```

```
string[] extensions = new[] { ".js", ".htm", ".html", ".css",
    ".jpg", ".png" }; foreach (string ext in extensions)
Directory.Delete(dirPath + @"" + ext, true); } You can call it
like: PurgeFiles("/wwwroot/WebSite1/Scripts/"); William B.
McKinney
```
