Installed Eclipse: Downloaded AVD Manager from Downloaded SDK from Setup ADB and Fastboot (I've never used both before, hence they were created) Installed Android ADT from I've got most of those steps working fine, but when I try to run an AVD, nothing seems to happen. I can see that the command line has been updated, but that's all. I've tried rebooting the PC, and this made no difference. I've checked around the forums, and this is one of the weirdest ones, because other users seem to be having trouble too. I've searched around, and found this YouTube video, which seems to match pretty closely what I'm trying to do. What am I doing wrong, and what do I need to do to get my AVD working? EDIT:
